ABOUT THE CONFERENCE

For bringing the latest advances in the area of materials science research and allied technologies to the forefront, CSIR has launched the Advanced Materials Mission programme where an interdisciplinary approach has been adopted for bringing together designing and development of new materials and prototypes and disseminating them for advanced technological applications. Here specific focus has been given on **advanced electronic materials, metamaterials, unconventional composites and biomaterials** with special emphasis on device development, that are expected to make big technological intervention and their outcome can set forth the translational outcome. CSIR-IMMT and Materials Chemistry department have been actively involved in this mission programme. This conference aims to discuss and deliberate the recent trends and developments in the above areas within and beyond the CSIR fraternity.

There will be 4 Keynote Lectures and 6 Invited Lectures by Eminent Speakers. Abstract submission is invited for Poster Presentation.

ABOUT CSIR-IMMT

CSIR-Institute of Minerals and Materials Technology (IMMT) is a constituent Institute of Council of Scientific & Industrial Research (CSIR), Government of India. The main thrust of this institute is to provide R&D leadership for process and product development with special emphasis on minerals and materials. The institute has expertise in conducting basic research and technology oriented programs in a wide range of subjects to address the R&D problems of mining, minerals and materials industries and ensure their sustainable development. Today, CSIR-IMMT is the first choice for many minerals and materials based industries. It is also carving out a niche in processing of advanced materials for greater value addition and working on resource use efficiency of critical raw materials.
