

ANIL DUBEY, Scientist-D

Address: PTS&ST Department, CSIR-IMMT, Bhubaneswar, Odisha-751013

Email: anildubey.immt@csir.res.inContact no: **0674-2379171**

AREAS OF INTEREST: Hydraulic Transportation & Pneumatic Conveying of minerals, ores and industrial wastes, Design and development of material handling equipment.

EXPERIENCE:

1. SCIENTIST-C, CSIR-IMMT, 20th Jan 2021- 20th Jan 2025
2. SCIENTIST-D, CSIR-IMMT, 21st Jan 2025 - Till Date

EDUCATIONAL QUALIFICATION:

1. M. Tech, Machine Design, VSSUT Burla, Odisha
2. B. Tech, Mechanical Engineering, BPUT, Rourkela, Odisha

ONGOING PROJECTS:

Sl. No	Title of the Project	Participating Agencies	Role
1.	Study on feasibility of transportation of coarse minerals/ore particles (upto 20mm) through an inclined slurry pipeline for applications in opencast mining.	CSIR, New Delhi	Principal Investigator
2.	High Concentration Slurry Disposal (HCSD) System Design of 2 × 800 MW KTPS, Koderma for M/s JSP Projects Limited.	JSP Projects Pvt. Ltd.	Co-Principal Investigator
3.	Hydraulic transportation of raw material/tailings for the critical minerals through horizontal slurry pipeline.	CSIR, New Delhi	Co-Principal Investigator
4.	Pilot scale development and performance assessment of novel indigenous impellers for energy-efficient ultra-fine grinding.	CSIR, New Delhi	Investigator

PROJECTS COMPLETED:

Sl. No	Title of the Project	Participating Agencies	Role
1.	Studies on dense phase pneumatic conveying of bulk solids.	CSIR-IMMT, Bhubaneswar	Principal Investigator
2.	Study of the conveying characteristics and behavior of iron ore in pneumatic conveying system.	NMDC Ltd., Hyderabad	Co-Principal Investigator
3.	Studies on feasibility of coal-water slurry preparation, transportation & dewatering of pulverized coal.	CSIR, New Delhi	Co-Principal Investigator
4.	Ash rheology studies of Lara Super Thermal Power Project (2×800 MW) for HCSD system design.	BHEL, Bangalore	Co-Principal Investigator
5.	Ash rheology test for HCSD system design of 1 × 660 MW Panki thermal power station.	BHEL, Bangalore	Co-Principal Investigator
6.	Rheological investigation of Ash dyke Fly ash samples for pipeline transportation at BALCO, Korba, Chhattisgarh state.	BALCO, Korba, Chhattisgarh	Investigator
7.	Rheological testing of Fly ash samples for pipelines transportation at Reliance Power project, Singrauli, M.P.	Sasan Power Ltd. (Reliance Power), Singrauli, MP	Investigator

8.	An investigation on the failure analysis of the coal ash slurry pipeline.	Macawber Beekay Pvt Ltd., Noida.	Investigator
9.	Implementation of TERAFIL water filtration systems in Iron Contaminated areas of Jharkhand & Odisha and optimization of TERAFIL raw materials & its process for Eastern region of India.	Ministry of Jal Shakti	Investigator
10.	Design and development of a pilot scale paste thickener for eco-friendly tailings disposal in Indian iron and steel industry.	CSIR, New Delhi	Investigator
11.	A detailed investigation of the erosion and corrosion wear in the presence of chemical/bio-additives to forecast the life-cycle of the industrial pipeline.	SERB, New Delhi	Investigator
12.	Studies on influencing parameters of erosion wear in slurry pipeline.	CSIR-IMMT, Bhubaneswar	Investigator
13.	Light weight automotive component from indigenously developed 6063 aluminum alloy powder by additive manufacturing.	CSIR, New Delhi	Investigator
14.	Jigyasa 2.0 Program with the concept of Virtual Lab Integrated Facility Creation & Training.	CSIR, New Delhi	Member

ACHIEVEMENTS:

1. Successfully upgraded and commissioned pneumatic conveying pilot plant with 55 m long, 2-inch NB MS pneumatic conveying line, 7 bar-250 CFM capacity screw air compressor. My responsibility was to upgrade the plant with instrumentation for automatic Data Logging. The instruments included a Thermal Mass Flow meter, a PT100 temperature sensor, 09 Flush Diaphragm type pressure transducers, 12 Digital Indicators for monitoring system operating parameters and a 24-channel data logger. A 40 m long purging line of ¾ inch NB, 500 CFM refrigerant air dryer and 500 CFM Pulse Jet Mechanism type bag filter were also installed under my supervision.
2. Involved in the design, fabrication and installation of a 50 kg/hr Pilot Scale Paste Thickener.

SKILLS:

1. **CAD:**
Fusion 360 (Design, Drawing and Animation), CATIA V5 (Part Design), Solidworks Design
2. **Machine Learning** using Python and Matlab.
3. **Numerical Computation** using Matlab and Octave.
4. **Rheological investigation** of mineral suspensions- Flow Rate Curve (Shear Stress vs Shear Rate using Cup and Bob geometry), Measurement of Yield Stress using Stress Growth method and using Vane Geometry.

TRAININGS:

1. Matlab for mechanical engineers (Skill-Lync Certificate UID- efd5pokjx2wlmthb).
2. Python for mechanical engineers (Skill-Lync Certificate UID- hzermvju3o7x2tcw).
3. Numerical methods for engineers
(Coursera- coursera.org/verify/MY4UHGQM7ZA4).
4. Introduction to Machine Learning
(Coursera- coursera.org/verify/WZZTA9U9M3N2).
5. Machine Learning Fundamentals in depth
(Skill-Lync Certificate UID- MWn5LjQgP914qOfy).
6. ANSYS Meshing- Learn how to use Ansys Meshing effectively (Certificate url: ude.my/UC-b036ca0d-4b74-4741-8e0b-a35702a16727).
